

Serif Health Data Dictionary

A decorative graphic consisting of several colored squares of varying sizes arranged in a stepped pattern. The colors include green, purple, blue, orange, and dark blue.

This is supporting information for the 2023 Health Data for Action (HD4A) Call for Proposals. To apply, or for more information about the funding opportunity, please visit www.rwjf.org/cfp/hd4a4.

Serif Health Price Transparency MRF Data

Standard CSV Schema

The CSV Schema is a direct conversion of fields from the source JSON files to CSV columnar formats. NPIs are 'grouped' together per EIN.

Note: All CSV columns are stored as quoted text strings in the raw file; those quoted strings will need conversion into the 'Data Type' listed below.

CSV Column	Data Type	Notes
Payer	text	Full payer name, e.g. "Blue Cross Blue Shield of Alabama"
Region	text	Two letter region code (state abbreviation), if nationwide network will be "US"
Network	text	Full network name where delineated by payer MRF index, e.g. "Blue Choice Platinum for Business - PPA"
EIN	text	Will be a 9 digit EIN without hyphen or 11 digit NPI number, each payer may use either format. EINs can be zero-led so this must be a text field.
NPI List	array<integer>	Comma separated 11 digit NPI values
NPI List Length	integer	Count of NPIs in the NPIList
Taxonomy	text	Most common NUCC Taxonomy code for the NPIs in the NPI List field, as determined by NPES
Code	text	Three char DRG, Four char RC, or five-char CPT or HCPCS code. May contain letters
Code Type	text	Allowed values: "DRG", "RC", "CPT", "HCPCS"
Modifier List	array<text>	Any billing code modifiers present on this code and rate, comma separated. If not present, will be an empty string
Bundled Code List	array<text>	For 'bundled' or 'capitation' arrangements, comma separated list of codes included in the bundled rate, otherwise empty string.
Billing Class	text	Allowed values: 'professional' or 'institutional'
Place Of Service List	array<integer>	Comma separated list of CMS place of service codes that apply to the stated rate
Negotiation Type	text	Allowed values: "negotiated", "derived", "fee schedule", "percentage", and "per diem"
Arrangement	text	Allowed values: 'ffs', 'bundled', 'capitation'
Rate	float	Decimal with two digits after a period, no commas or dollar signs. e.g. 10125.85
